

$$(1) 5 \times (2 + 14) - 15 \div 5 =$$

$$(2) 6 \times 2 \div (11 - 8) + 4 =$$

$$(3) 7 + 18 - 60 \div (6 \times 2) =$$

$$(4) 16 + (20 - 15) \times 3 \div 3 =$$

$$(5) 18 \div 3 \times (18 - 2) + 17 =$$

()がある計算のプリント(6)

$$\begin{aligned}(1) 5 \times (2 + 14) - 15 \div 5 &= 5 \times 16 - 3 \\ &= 80 - 3 \\ &= 77\end{aligned}$$

$$\begin{aligned}(2) 6 \times 2 \div (11 - 8) + 4 &= 12 \div 3 + 4 \\ &= 4 + 4 \\ &= 8\end{aligned}$$

$$\begin{aligned}(3) 7 + 18 - 60 \div (6 \times 2) &= 25 - 60 \div 12 \\ &= 25 - 5 \\ &= 20\end{aligned}$$

$$\begin{aligned}(4) 16 + (20 - 15) \times 3 \div 3 &= 16 + 5 \times 3 \div 3 \\ &= 16 + 15 \div 3 \\ &= 16 + 5 \\ &= 21\end{aligned}$$

$$\begin{aligned}(5) 18 \div 3 \times (18 - 2) + 17 &= 6 \times 16 + 17 \\ &= 96 + 17 \\ &= 113\end{aligned}$$
